Great promotional opportunities

Easy to read for tee times

Specifications

Our golf ball clocks offer an eye catching way of displaying a sponsors details or information about the club or course. Available without clocks, with one clock face or with two clock faces on opposite sides.

Manufactured in GRP with scaled realistic dimples, this 650mm diameter, 2100mm high clock feature will grab everyone's attention. Both the ball and tee can be personalised in many ways including logos and text, as well as tee and green information.

The acrylic clock dials measure 360mm in diameter. The dial cover glasses are produced in clear UV stable PETG (high impact acrylic) and are fitted with security screws.

The clock movements are battery powered and require manual adjustment for time changes. Mains powered mechanisms and controllers are also available at an additional cost for automatic adjustment after power failures and summer winter time changes.

The tee and spigots are fabricated in aluminium which is then powder coated in a choice of four standard colours: green, red, white or yellow.
